COUNTDown

Since its launch eleven years ago, COUNTDown has become an established favourite with diesel vehicle users. COUNTDown is a single diesel fuel treatment that reduces particulate emissions, improves fuel economy and reduces engine and component wear.

Wilkinson; a regular user of COUNTDown

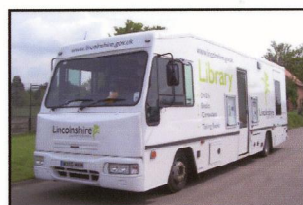

It sounds too good to be true but, the makers Highspeed Lubricants Ltd, carried out exhaustive laboratory and field testing before launch and with impressive results. COUNTDown has been taken up by many in the commercial field including transport fleets, county councils and some "blue light" services and is now in use across the country with individual motorists. Typical is the response from the Wilkinson Group. This leading high street retailer is a regular COUNTDown user and takes its environmental responsibilities seriously especially when it comes to its transport fleet. With well over 100 lorries on the road servicing the home and garden retailers 200 plus stores in England and Wales, the company considers vehicle safety and pollution control vital so it uses COUNTDown to maintain low particulate emis-

sions. COUNTDown use too. Martin Hall, Head of Procurement at British Trust for Conservation Volunteers, operating well over 300 vehicles, has been a regular COUNTDown user since its introduction. His memo to all staff following field trials and particulate testing said: "The

savings from the improvement in fuel consumption usually exceed the cost of treatment, allowing us to drive in a more environmentally sensitive way without it costing us a penny." Delighted individual users often write in with details of fuel savings and Steve Taylor of Portsmouth was so impressed with his 50% improvement on his MOT test, he sent the before and after readings in to prove it!
