COURSE CARE

The number of Course Care's ClearWater washpad water recycling systems being ordered and fitted in the UK and the Irish Republic are growing rapidly as the company continues to hold their prices for another year in response to increasing demand for washpad solutions. Q Hotels are the latest group to specify ClearWater for its golf locations and very recently De Vere, Mottram Hall installed a ClearWater system.

Course Manager Stuart Stenhouse told us: "We chose

ClearWater for Mottram Hall as the system is simple and straightforward with very easy maintenance. Having seen the other systems on offer, I felt that ClearWater was the obvious choice, especially from a security point of view. I was impressed with the "turn-key" package offered and could not fault the work of the installation team or their clean-up! The guys are very happy with the system."
